Military Teamwork Best . . .

Our first Secretary of Defense, James Forrestal, said: "Whether it be in business, government, or military operations, I mistrust the principle of relying on a single genius to make all basic decisions."

The assertion that a single chief of staff system is efficient, economical and desirable from a national standpoint is not supported by history, fact, or experience. The concept has fatal defects from military, political and economic standpoints.

Our Joint Chiefs of Staff organization has in practice demonstrated the genius of the American people for democracy. This system has solved the problem which has long plagued democratic republics, the difficulty of being militarily strong without becoming militaristic. Other advantages of this system are many and certain.

It has demonstrated that where speed of decision is required, it can meet the test.

It assures our nation that vital decisions are arrived at after a sound deliberative process. Our national survival is based, not upon the whim of an individual, but upon the decisions of the best military minds our nation has available.

The Joint Chiefs of Staff organization assures the proper development and employment of our land, sea and air forces.

Where Advertising Is Welcomed . . .

An impressive valuation of the merits of newspaper advertising as compared with television advertising has been provided by Robert J. McBride, director of Research for the Detroit Free Press. He says: "People watch television because of the entertainment—commercially actually are intruders. A survey by Northwestern University shows that 61% of housewives would prefer TV without commercials."

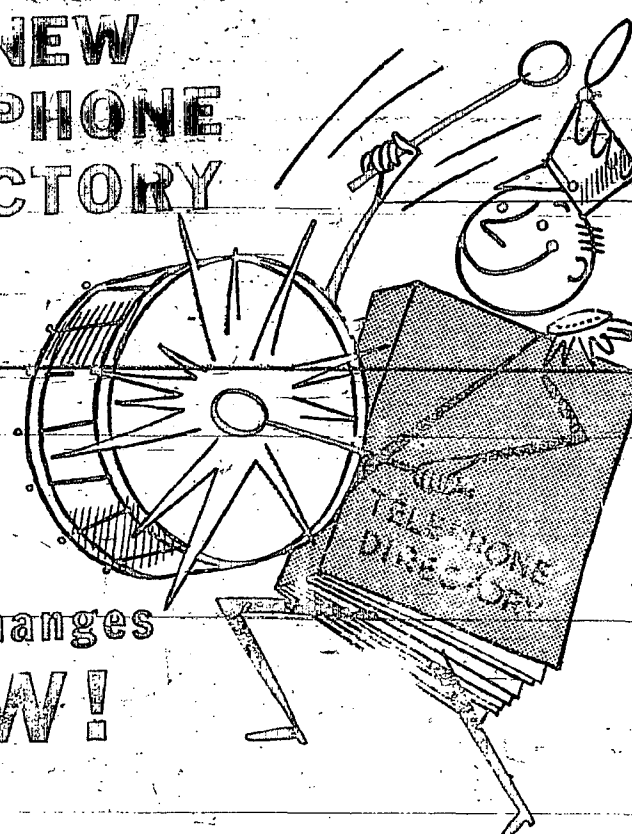

"At the same time, advertising is an integral part of the newspaper. Readers buy the paper for the ads as much as for the editorial matter. Both men and women readers plan their shopping from the newspaper. The Northwestern survey shows that 92% of the respondents want their newspapers with advertising."

This brings Mr. McBride to his completely logical conclusion: "The advertiser gets the best results when his message is welcomed and desired."

Interesting Events In Grayling 23 Years Ago

INTERESTING ITEMS OF NEWS GATHERED FROM THE FILES OF THE AVANCE OF 23 YEARS AGO

July 5, 1934

Last spring the voters of Grayling elected a P. W. A. bond issue for the purpose of constructing a new waterworks system. The proposal has been hanging fire ever since until last week when it was finally approved by the public works committee in Washington. This will give Grayling a modern waterworks system, affording pure water and fire protection for every home within the village limits. A new pump house and standpipe will be built on the city park next to the AuSable River. Congressmen Woodruff and Hart deserve a lot of credit for their efforts toward putting the matter over. Now the bonds will need to be arranged for, contracts let for materials and construction. It was said at the council meeting last Monday morning that it would probably be two months before actual construction work would begin. Another very important object to strive for, after the waterworks are taken care of, is a sewage disposal system. We have no moral right to continue emptying our sewers in the AuSable River.

The schedule for the recreational program has been rounded up and 147 boys and girls are engaged in an organized and constructive type of summer recreation. Of the activities, swimming under the direction of Kenneth Gottho, leads the enrollment with 98 participants. Tap dancing and Story Hour under Elaine Rugga is a close second with 84.

baseball, playground tennis and boxing have their share of contestants. Girls and boys teams in baseball, swimming and tennis, are being organized. A boxing team is contemplated in order that a full schedule may be arranged with other towns for the summer.

The newspaper publishers and their families were guests of Johnson's Rustic Resort at Houghton Lake the last three days of last week and they are still talking about what wonderful time they had. There were over 200 present.

It was a nice catch of trout that Henry B. Smith, Jr., and Jack Redhead were exhibiting. Paed-day morning, they had 10 trout, the combined weight of which was 12 pounds. One rainbow was 2 1/2 inches long and tipped the scales at 4 1/2 pounds. Two 16-inch brown trout weighed 3 pounds each. They were caught on squirrel tails and caddis flies.

46 YEARS AGO

July 6, 1911

They all come back. This time it is William Shellenberger and family who moved to Alabama three years ago, who arrived on Thursday to stay.

"After over thirty years of constant sliding with the Avalanche, we present with our compliments our sweetest smile and lowest obsequence and say 'goodbye' as editor. For the errors I have committed and the enemies I have made I am willing to be forgiven, and promise that my interest here shall be no less than in the past, and I lay down the paste pot, shears and pencil with my best wishes for the success of every citizen of the county, past, present or future, D. DON'T BUY ANY OTHER CAR. IT'S BEST SHOWROOM IS THE ROAD

Beauty in motion—Chevrolet Bel Air Sport Sedan with Body by Fisher.

Here's why Chevy's best showroom is the road!

Because Chevrolet's sleek good looks, its advanced features, are only part of the story. The big bonus is its remarkable roadability, the crisp precision handling that has posted an entirely new standard for cars in every price class. There are reasons for this, of course: Chevrolet's balanced weight distribution that takes

excessive loads off the front wheels, the wide stance of outrigger rear springs, Ball-Race steering, spherical-joint front suspension. Sure, you can admire the sculptured lines in the showroom. But Chevy's a car specifically designed for beautiful motion—you have to travel in this one to know just how terrific it is. Try it, this week!

Local Sister, Brother At Interlochen

Grayling will be represented at the famed National Music Camp at Interlochen, Michigan, this summer by Arnold Stancil and Anne Marie Stancil, students at Grayling High School and children of the Thomas Stancils of Grayling.

The National Music Camp which is celebrating its fifth anniversary season was established at Interlochen, Michigan, in 1928 to provide specialized advanced instruction for unusually talented young musicians. During the years it has expanded its program to include art, drama and dance studies. The camp, which runs from June 23 through August 18, boasts eight symphony orchestras, four symphonic bands, seven choral organizations, and numerous other activities which promote training and experience in music, art, speech and dance. A complete recreation program, with instruction in land and water sports, provides an ideal balance between work and play for the campers.

The University Division of the Camp is affiliated with the University of Michigan and credit is offered on graduate and undergraduate level.

Over 1,200 students will attend the National Music Camp's regular season where a staff of specialists will guide and train them in their respective arts activities. Some 300 public performances and radio broadcasts will be presented by the students during the eight week season.

Bear Lake News

By M. D. the Roving Reporter

There has been many a meeting of the River and Bear Lake Associations as to what to do about fish plants in Bear Lake. One of the things people around the lake did not want was pike. So what happens? In comes Kenneth Hixson, Earl Nichols and Art Nummer with a five pound pike. The question is, how did they get into Bear Lake and how many more are there? It had a six-inch perch inside it. Now our observation men say it is not a lake for walleyes, but won't walleyes live where pike do? This is the second lake to be taken out of Bear Lake. This one was caught on a mouse.

The Bear Lake School Board will hold their annual meeting on Monday, July 8, at 8:00 p. m. at the Bear Lake Township Hall.

The Women's National Bear Hunt Association are holding a public auction sale on Saturday, July 13th, at Sherwood's Welding and Repair Shop, 4 1/2 miles east of V-66 on M-72. All donations are appreciated and will be left at the site of sale or will pick up.

Old Fashioned Bargain Days in Grayling brought out many old-time stunts. Pictured above from left to right are Mrs. Loretta Johnson, Mrs. Floyd Johnson, and son, which was in some of the day's events.

Mrs. Clayton Kellogg of the Grayling 5c to \$1 Store was dressed in a style "fit to kill" of about 1900. Nels Olson looked every inch the head man of a shoe emporium in his old-time duds. Janet LaGrave shows that even the small fry took part in Grayling's weekend celebration.

Kiddies' Pictures To Be Taken Free For Publication

They grow up so fast, don't they folks? Why not let us help you preserve your memories by making an everlasting picture of your youngster in our KIDDIES' KALENDAR, a photographic feature to be published soon in the Crawford County Avalanche.

We've invited United Studios, of Elkhart, Indiana, an experienced children's studio, to take these special pictures for us. An expert children's photographer, equipped with the very latest in lighting, the new "speed" lights which eliminate all movement and floodlight glare, will be here on Tuesday, July 16. The special studio will be set up at Shoppens Hotel and will be open from 12 M. to 8 P. M. These special lights, incidentally, enable the photographer to obtain natural expressions on children who are ordinarily frightened of bright lights.

There is no charge to the parents, absolutely no strings to our invitation. Parents do not have to be subscribers nor even readers of this newspaper. Neither are they obligated to purchase pictures after they are taken. Selection of the pose to be printed in the paper is left to the parents, at which time additional pictures may be ordered, if so desired, from the representative of United Studios.

Make our KIDDIES' KALENDAR this year a big success, folks! Remember the date, Tuesday, July 16, at Shoppens Hotel and don't miss this free opportunity to see your children's pictures in print. WATCH THEM GROW! DOLL 'EM UP—BRING 'EM IN!

Kelsey in the fourth inning. Ausable Souvenir Sniggen's 11-10 with a three run seventh inning. In the two games Thursday night, Sniggen's pitcher gaining an 8-2 lead by the fourth inning, were held in check by the brilliant relief pitching of Jim Rouse who replaced Harvey Welch of Ausable Glee Kalsers.

Bob Weaver, and Tom Peterson all had two hits for Frederic. Eugene Case hit a home run with two men on in the fourth inning. In the big battle between the two top teams in Grayling on Saturday night, Mac's downed the previously invincible "nine old men" of Nelson Oil Co. by a 5-4 margin.

The winners collected seven hits, five of which were bunt singles, off losing pitcher Bob Gildner. Nelson had only two men on base in the first six innings but came up with four runs on three hits in the last inning to almost pull it out of the fire. The only extra-base hits of the game were a double by Bill Hall-St. of Nelson, and a triple by Jack Smith, Mac's Drug catcher.

50,000 Tiny Grayling Hatch

Some 50,000 tiny Montana grayling have hatched and are being raised in fish troughs at Wolf Lake hatchery, west of Kalamazoo.

The youngsters, purchased as eggs from a Montana state hatchery, join 50 other grayling which were hatched at the Wolf Lake station last spring. The fish in last year's batch are now 2-3 inches long.

The Detroit News gave the state Conservation Department \$1000 in the spring of 1956 to initiate a program to bring grayling back to Michigan. In the latter half of the 19th Century, Michigan streams were noted for grayling fishing and the present city of Grayling was named for this colorful trout-like fish. Native populations of the fish were abundant here until about 1900, then declined and finally dropped from sight after 1935.

State biologists hope to establish the grayling in Manistee Lake, Keweenaw county, this fall. The remote, 52-acre lake is ideal from the standpoint of water temperature, food supplies and other factors. The lake will be chemically treated this fall to remove other fish.

It is not expected that grayling will ever reach fishable numbers again in Michigan, but plantings are designed to establish a "natural place" population for exhibition and educational purposes.
